Jan. 30: Cynthia and Dan Lufkin gave a cocktail party in their apartment, the former chapel of the city's first cancer hospital at Central Park West and 105th Street. The event honored Ms. Lufkin, who is to be named the American Cancer Society's mother of the year on Feb. 26. The chapel, so tall that it was divided horizontally into a three-story apartment, is part of the original 1887 institution. Abandoned to pigeons for decades, it has been incorporated into a new apartment building.
